Subject: PROJECT UPDATE: Northeast Energy Direct Initial Survey

Tennessee Gas Pipeline Company, L.L.C. (TGP), a subsidiary of Kinder Morgan Energy Partners, L.P., is proposing the Northeast Energy Direct project, an upgrade to its existing natural gas pipeline system in Pennsylvania, New York, Massachusetts, New Hampshire and Connecticut. The proposed route and facilities are still being finalized, but as part of the routing determination, TGP evaluates a number of considerations, including impacts on the environment and existing land uses. In determining the constructability of a proposed route, surveys will be conducted to gather information that will allow TGP to refine the pipeline design and, in consultation with regulatory agencies, determine the most appropriate route that avoids and minimizes impacts on critical habitats and lands.

As part of our community outreach and information process, we plan to keep you informed about activities in your area that may be of interest to you or your constituents.

Representatives of TGP's Northeast Energy Direct project will begin preliminary survey activity along public roadways soon, and will potentially be in your area in the coming weeks. Survey will include setting control points by measuring distance and direction, and this may also entail the use of a helicopter to help refine a possible project route. TGP representatives will soon be in contact with the towns and police departments where this planned survey is to take place.

Please contact me with questions. Thank you.

Best Regards,

Allen Fore
